

## September Deals of the Month

The summer of 2020 has seen high levels of parasite challenge and as we go into autumn this will continue. Animals treated with long acting wormers at turn out will start to lose the protection these offer, potentially leaving them vulnerable to the worms that have been building up on the pasture. Haemonchus (Barber's pole worm) in sheep and lungworm in cattle are particular risks

To help both detect and combat this we are offering the following deals:

**25% off** all worm egg counts in September

If worming is needed, the following products are on special offer:

**Bimectin Pour-On**

**Taurador Pour-On**

**Zolvix Drench**

**Levacide Drench**

For more information or advice about these conditions please ring us at the practice and speak to one of our vets on **01666 823035 option 1** or

Contact our dispensary team on **01666 823035 option 2** for information on our special offers
