Farm Vets

Vet Tech Services

Our team of veterinary technicians are trained to the highest standards and can provide an affordable solution for stock management and on farm labour shortages.

The following services are offered:

Freezebranding:

Our team uses high quality WOPA irons and dry ice to provide a flexible and professional service.

Disbudding:

We provide handling facilities for pre weaned calves free of charge so our vet techs can performed disbudding with no additional help.

Friendly flies:

During the fly season, our team will visit our farm on a fortnightly basis and provide targeted application of friendly flies. These flies feed on nuisance fly larvae drastically reducing fly numbers over the summer without the use of harmful pour-ons.

Mobility scoring:

All our vet techs are ROMs (register of mobility scorers) accredited so can perform mobility scoring to the highest standards. Our mobility scores are accepted by all aligned contracts.

Vaccine administration:

All vet techs are trained to the highest standard on intramuscular, subcutaneous and intranasal vaccine administration. Whether it's routine weekly visits for pneumonia vaccine or one off whole herd vaccination you can count on us.

Calf weighing:

Our vet techs can visit farms routinely to provide accurate weights for growing animals. Data collection and analysis is included free of charge.
