

**We are helping a local vet and friend of the practice Jacob Trojanowski, who has started organising help for two charities in south-east Poland, both of whom he knows well and trust. One is focusing on helping humans, which has to be a priority. They provide food, water, medical help and coordinate transport and temporary accommodation in Poland and the EU.**

The other is a co-operative with the Polish government and is concentrating on their animals. At each border crossing, there is a veterinary help point. They examine all dogs and cats and vaccinate them against rabies (paid by the government). But as you can imagine they often need much more: they are transported in cardboard boxes, so they need cat carriers, dog collars and leads, also flea and worming treatment, microchipping.

**Jacob has committed to be personally responsible for the transport of all items and will take them directly to the two charities in Poland. He is looking to travel to Poland in 10 days. Can you help by dropping any items to us at The Hospital before Friday 11th March. THANK YOU**

### **For the refugees:**

- Antiseptic wipes
- Rescue blankets
- First Aid Kits
- Bandages/sterile dressings
- Surgical tape
- Medical gloves
- Emergency foil blankets
- IV fluids
- Cold/flu treatment
- Barrier cream
- Sleeping bags
- Batteries
- Torches

### **For their pets:**

- Pet carriers and crates
- Collars, harnesses, leads.
- Syringes and needles
- Medical gloves
- ID chip and scanners
- Worming and flea products
- Snap tests: parvo, FeLV/ FIV
- Blankets

*Note: that they have plenty of cat litter and pet food for now and so we are not asking for this.*
